# A Treatise on Differential Equations Volume 1

A TREATISE ON DIFFERENTIAL EQUATIONS Volume 1

GEORGE BOOLE

Filesize: 7.79 MB

Reviews

Merely no words and phrases to describe. I really could comprehended almost everything using this created e pdf. Your daily life period will be change once you full reading this ebook.
(Mr. Ladarius Stoltenberg)

A TREATISE ON DIFFERENTIAL EQUATIONS VOLUME 1

To download **A Treatise on Differential Equations Volume 1** eBook, make sure you access the web link under and save the document or gain access to other information which might be relevant to A TREATISE ON DIFFERENTIAL EQUATIONS VOLUME 1 book.

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1865 edition. Excerpt: .must eliminate c between the first integral in question and the equation ji = (r) wiere yn-i is tne value of, f expressed in terms d y of x, y.-y-jlj, c. by means of the given first integral. If the proposed first integral is rational and integral in form, then representing it by f = 0, it suffices to eliminate c between the equations, = f = It is unnecessary to dwell on the particular cases of exception after what has been said on this subject in Chap. vm. Ex. 1. The differential equation x2 y-yx + j y-Oi-xyy-y=o, has for a first integral required the corresponding singular integral. Differentiating the first integral with respect to b, we find whence b= j4-2t, and this value substituted in the given integral, leads to, . yt y, , (.y.-T 0 y 2 xi + Uxt(l + a?) or, on reduction, 16 (1 + x) y-8-zfy, -16 + x-16 = 0. In connexion with this subject, Lagrange has established the following propositions: 1st. Either of the first two integrals of a differential equation of the second order leads to the same singular integral of that equation. 2nd. The complete primitive of a singular integral of a differential equation of the second order will itself be a singular solution of that equation, but a singular solution of a singular integral will in general not be a solution at all of that equation. The proof of these propositions will...
