The teeth, which are confined to the jaws, are very formidable. These animals are all oviparous; the eggs, being encased with a hard covering, are laid by the females in warm, sandy places, where they are hatched by the sun, the parents sometimes taking no further care of their progeny. They are exceedingly voracious, and abound in the fresh waters of warm climates. Some species hide their prey under water for several days, until it begins to putrefy, when they devour it. Getius CROCODILE: Crocodilus.--Of this there are several species in Africa, Asia, and America, but none in Europe or Australia. The...
